Re: Forenza Project
375 Cherry Lane
Block 2301, Lot 3

Addendum to Checklist for Minor Subdivision Approval

Item #30- The proposed location of all screening and landscaping, and a planting plan indicating natural vegetation to remain and areas to be planted with a schedule providing a listing of botanical and common names, quantity and size at time of planting.

Waiver is requested at this time- Existing vegetative boundaries are shown on the plan (i.e., woods line, lawn and open field areas). The area where a new dwelling would be constructed on the proposed lot is in an open field set back off Cherry Lane approximately 300 feet. There are existing mature trees lining the property boundaries and existing driveway entrance. The owner/applicant respectfully requests a waiver for providing any new plantings at this time.

Item #32 - The location and extent of drainage and conservation easements and stream encroachment lines.

Partial Waiver is requested at this time- The owner/applicant understands that modified conservation easements are appropriate to protect environmentally sensitive lands found on the property. It is noted existing conservation easement boundaries are shown on the plans. He would like to have the opportunity to review the placement of modified conservation easement boundaries with the Land Use Board and their professional staff during the board's review of the proposed project.

Item #36 - Deed descriptions, including metes and bounds, easements, covenants, restrictions and roadway and sight triangle dedications.

Partial Waiver is requested at this time- Metes and Bounds descriptions of both lots, a new driveway easement and modified conservation easements would be created once the proposed lot geometry and easement boundaries are confirmed by the Land Use Board and their professional staff. It is noted that no modification of the metes and bounds of the Cherry Lane right of way are necessary for this project. In addition, no new driveway entrances are proposed onto Cherry Lane. The existing and proposed lots will continue to use the existing driveway entrances found on site.

Item #52 – A Letter of Interpretation from NJDEP (for Freshwater Wetlands and Transition Areas)

Partial Waiver is requested at this time - An investigation and delineation of freshwater wetlands was completed by Environmental Technology Inc. (ETI) of Chester, NJ. The limit of the wetlands delineation and wetland transition area are depicted on our current plans. NJDEP verification of the wetland and transition area boundaries are pending. Upon receipt of the NJDEP-Letter of Interpretation a copy will be provided to the board. Hence a partial waiver is requested. You will note that there are no wetlands and or transition areas within the areas of proposed construction activities.

Item #53 – For each lot not served by public sewage disposal, approval by the Board of Health of percolation tests observed by the Borough Health Officer and certified by a licensed engineer, indication that the proposed lot can adequately accommodate a septic system in compliance with local and state regulations.

Partial Waiver is requested at this time – Our firm completed an on-site soils investigation and found acceptable results for subsurface sewage disposal in accordance with local and state regulations. The testing has been witnessed by the Board of Health. Written approval from the Board of Health is pending and will be provided to the board upon receipt. Copies of the test pit results, and their respective locations are found on the proposed plans.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Smith', written over a horizontal line.
