

BOROUGH OF MENDHAM **PET WASTE AND** **WATER POLLUTION**

Mendham Borough has adopted and enforces an ordinance that requires immediate and proper disposal of solid pet waste deposited on any property not owned or possessed by the pet owner or keeper. As set forth in the [Borough Code](#) by Chapter 72, Section 12, Any person owning or in charge of any dog or pet which soils, defiles, defecates on or commits any nuisance shall immediately remove all feces/solid waste deposited by any such dog or pet in a sanitary manner.

Pet waste is carried by rain, melting snow, and ice to storm drains that empty into rivers, lakes, and the ocean. It also reaches reservoirs which supply much of the drinking water in New Jersey.

Pollution due to pet waste negatively impacts swimming, boating and fishing in these water bodies. Pet waste contains microorganisms that can cause bacterial diseases, roundworms and parasitic infections.

In addition, pet waste contains harmful levels of nutrients which promote excessive algae and plant growth. This can rob the waterbody of oxygen, potentially killing all aquatic life in the area. Such nutrient pollution also causes waters to become cloudy and green.

Proper Pet Waste Disposal

Flush it down the toilet.

But do not flush bags, debris, or nonbiodegradable items

OR

Put it in the trash.

THANK YOU FOR DOING YOUR PART TO KEEP NEW JERSEY'S WATERS CLEAN
